

Education

Al-Balqa' Applied University
B.S. in Computer Engineering

Sep 2018 - Jan 2023

Amman, Jordan

Professional Experience

Nixpend

Sep 2022 - Present

ERP Developer (Backend Developer)

Amman, Jordan

- Developed and maintained backend services for a cloud-based healthcare ERP system.
- Implemented insurance integrations and connected the system with external platforms using APIs, while contributing to new features and bug fixes.

Personal Projects

Found Child ([GitHub](#))

Jan 2023

- Build a website to connect families who lost a child and the ones who found that child
- The main idea of the project is to match the child base on face regression
- I build the backend side, I used Django, and for the face regression I used a DeepFace library | python

Online Store ([GitHub](#))

Aug 2022

- an eCommerce website, it provides a all the tech equipment
- python| Django as the backend
- Html, CSS, and JS for the frontend

School System ([GitHub](#))

Mar 2022

- a small system that handles all the data related to schools like students, teacher information, marks, and subject
- python | Tkinter as an interface
- MySQL as a database
-

Web scraping

- Scraping a lot of websites such as
 - Amazon ([GitHub](#))
 - edx ([GitHub](#))
 - opensooq ([GitHub](#))

Auto Rating ([GitHub](#))

- build a small system to automate the rating professors process at the end of the semester at my university
- Using python | BeautifulSoup, selenium
